MT 40P.10 Disposable grinding chamber, bended beater

/// Data Sheet

A new grinding/milling chamber extends the application range of the IKA TubeMill control.
Its stainless steel beater is bended in a 45° angle.

Advantages:
-Especially for mixing of fine powders
-Its bended beater creates a more effective flow in the chamber which leads to an even better grinding result
-Recommended mixing speed 10.000 rpm

designed for scientists

Useful volume: 40 ml
Quantity: 10 pieces/pack
Material grinding chamber: PP

designed for scientists
